

Dear Campus Community,

As you know, Governor Newsom's office has recommended a reopening of the State of California today (June 15, 2021). For our planning purposes the Governor pointed to the Center for Disease Control's recommendations for colleges and universities. We will be examining this guidance along with the most recent Cal/OSHA emergency standards to determine best practices for the District.

Moving forward beyond the June 15th reopening we will continue to maintain current face covering, physical distancing, and temperature screening requirements - and will also continue to review applicable orders and guidance from the State of California and the local health department related to COVID-19 hazards and prevention.

While we are excited to continue our phased reopening of the campus, we want to do so with a slow, safe and sustainable approach. The state strongly recommends eligible students, faculty and staff get the COVID-19 vaccination. Learn more about how you can get vaccinated on our [information page](#).

Thank you all for your patience and hard work in the last year.

Distribution: staff, faculty, adjunct faculty, Governing Board, Chaffeyans

Sincerely,

Henry D. Shannon, Ph.D.
Superintendent/President

Chaffey College
