- Ruth Delgado, Counselor
- Joy Haerens, Business & Office Technologies
- Bret McMurrin, Economics
- Henry Rivas, Correctional Science
- Eva Rose, Communication Studies
- Michelle Tardiff, Business & Office Technologies

### **30 Year Service Awards**

- **Bonnie Fuller, Disability Programs & Services**
  - Has taught off campus for most of her career at Chaffey.
  - Served for many years on the College Book Committee.
  - Long-time member of the California Association for Postsecondary Education & Disability

- Bonnie is married to a high school teacher and they have three daughters. One daughter received her Masters in Social Work, one teaches pre-school/kindergarten, and her youngest daughter is in high school.
  - Enjoys scrap booking, crafts and is active in her church.
- **Arlene McCall, PE/Athletics**
- Professor of Physical Education
  - Served as head Women's Basketball Coach for 17 years
  - Assisted the Women's Track and Field Team
  - Served on the ASCC/Student Activities Faculty Advisory Board for the past 12 years. In that capacity she is a scholarship judge and moderator at the annual scholarship program.
  - She volunteers at the ASCC Elections to oversee the 5-day election polls.
  - Arlene encourages all of her students to get involved in Student Life. As a result her students have run for ASCC positions, attended extra curricular events, applied for scholarships and donated to the community fund raisers. She is an invaluable member on the board.
  - Licensed and Ordained Associate Pastor and has served over 20 years of traveling missionary work for her church.
  - Devoted to her family. She is the mother of two children and 7 full-time PE faculty members.
- **Karen Pender, Mathematics**
- When Karen began her first year at Chaffey in 1979, which almost became her only year during the attempted purges of faculty by President Catanzaro, she shared an office with male colleagues – she still does with different colleagues, of course, in a different office. Stereotyping was still flowering and so for quite awhile students, not hers of course, thought she was the administrative assistant to her male colleagues. You can imagine that that didn't go over too well.
  - She was the alternate division chairperson during the years that Bob Toister and Margaret Greever were the Division Chairs of Physical Science in the 1980's.
  - She has served on both the Faculty Senate and the CCFA Rep Council. Ten years after her hire, when the faculty and CCFA were in a bitter dispute with the District over salary, she played a notable role as the Physical Science rep.
  - She has served on a number of campus wide committees including two student discipline committees almost two decades apart, priority registration and the alternate calendar committees when Marie Kane was President. In addition, she attended a Supplemental Instruction conference in Kansas City and is an active proponent and participant in SI at Chaffey.
  - She continues to make outstanding contributions to the Math Department. These contributions include: serving on most of the hiring committees for

tenure track math positions, chairing a number of textbook selection committees (the Math Department uses by consensus one book for each course it offers), and being a prime advocate and organizer of curriculum revisions to courses from algebra through precalculus.

- She continues to be passionate about teaching; she has taught most of the courses offered by the Math Department.
- She is a Trekkie and proud of it.
- She is very proud of her two sons – an electrical engineer and a neurologist.

➤ **Marylee Requa, Sociology**

- Has been a valuable member of the Sociology Department and enthusiastic colleague for these 30 years.
- She is one of those energetic scholars who has been able to add publications to her list of accomplishments while teaching her classes.
- Marylee continued her active role as teacher-scholar with her sabbatical in the Fall 2007 researching new alternate forms of community and presented her project to the Governing Board upon her return to campus.
- She is not only a dedicated teacher and sociologist, but has been very active in the field of Staff Development, serving as Staff Development Director here at Chaffey from 1991-1994 and again from 1997-2003.
- CCFA Grievance Chair
- CCFA Vice President
- Social & Behavioral Sciences Faculty Senator
- Chaffey College Coordinator for annual Regional colloquium on Teaching and Learning, 1997-2003.
- VP, 4C/SD State Executive Board, 2001-2003
- Flexible Calendar Coordinator, 1991-1994 & again from 1999-2003.
- Coordinator, Classroom Assessment Techniques, Title III Grant, 1999-2000.
- Produced a Campus Climate Video based on taped student interviews in 1994 in collaboration with the Faculty Senate.
- Loves to play games.
- In her interview for a full-time sociology position in the 70's, it was clear at the outset that we should hire her, and she has fulfilled that promise. She is positive, effervescent, creative force, a person who always helps others: colleagues, friends, family, and strangers. She commits time and energy where it is needed. She is a force to be reckoned with, when there is a cause that needs recognition and work.
- She teaches from a perspective of contagious passion for progressive social action. She creates opportunities for students to engage in the world, especially on environmental and sustainability issues. And she walks the talk in her personal life.
- She and her daughter, Larissa, share similar perspectives and passions. Larissa became a sociology major, and she teaches Marylee about

environmental issues. They hike together, travel to Spanish-speaking countries together, take naturalist classes together. Their relationship is a reflection of Marylee's influence on the next generation: as a role model, confidant, facilitator, and "teacher."
