How to Install Firefox on Your PC

1. Click on the lower left start button

2. Click on All Programs

3. Click on Microsoft System Center 2012 R2

4. Click on Software Center

5. When the Software Center window opens, put a checkmark next to Mozilla Firefox, and click on Install in the lower right corner of the page.

FireFox is now installed. You can pin it to your Start Menu or Task Bar.
