Did you know that it's likely that most of your students are taking a math class?

Please join us in the discussion about how to help your students achieve their goals.

-What do you say when one of your students declares: "I hate math."

-How can we help to promote students' perceptions of mathematics?

-How to help your students' view of notorious "barrier" courses, like mathematics.

-Just as they say "it takes a family to raise a child" ..."it takes a college to get students to earn a degree."
