got si? Find out ways to get additional support in your class. Together we can bring more of your students up to your high level of standards.

"Tell me and I forget, show me and I remember, involve me and I understand"

Supplemental Instruction (SI) is an internationally recognized program that has been around for over 30 years. SI is a series of weekly study sessions facilitated by a trained student leader. Attendance is voluntary and open to anyone enrolled in the selected course. The study sessions will help students improve understanding of course material, develop study strategies, and prepare for tests.

In this workshop, Robin Witt, Mathematics Instructor and SI Facilitator, will give an overview of the program, provide research on the success of the program at Chaffey College, and describe the role faculty members play in the program. In this interactive workshop, participants will also be able to take part in a mock SI session.
