CREATIVELY ENGAGING ONLINE STUDENTS: MODELS & ACTIVITIES

Video Online Seminar - 90 minutes
Wednesday, January 20, 2010
12:30 PM or 3:30 PM
Both sessions will show the same information.
Due to limited seating, sign-up is required.

How do you make sure your online classroom is “engaged”?
Student engagement—or, rather, the lack of it—is a critical problem in distance learning today.

Dr. Curt Bonk provides a wealth of tips and techniques you can put to work in your online classroom right now. In this idea-filled presentation, you’ll:
• Learn how to address student learning preferences online.
• Discover ways to motivate students in online environments with Dr. Bonk’s innovative TEC-VARIETY model.
• Take home a minimum of a dozen ideas you can use in your classrooms and programs.
• Get the facts on two unique ways of thinking about teaching and learning in online environments.
• Hear about a wealth of low-risk, low-cost, low-time activities.
• Create a vision of what you would like your classroom to be, and develop a plan to achieve it.
• See how to use the “R2D2 model” for thinking about diverse learning needs.
• Understand how the example you set online can help (or harm) your students.
• Learn to build peer and expert feedback into your online classes with techniques like critical friends and cross-institutional mentoring.
• Find out how to successfully prepare students for the rigors of online learning.
