Chaffey College’s comprehensive Information Technology program will prepare students for careers in the explosive information technology fields as well as enable those already employed to upgrade skills for technological and employment advances.

The Information Technology Center prepares students for careers in the following fields:

- Network Administration
- Programming
- Cisco Internetworking
- Microcomputer Repair and Support
- Web Page Development
- Network and Fiber Optic Cabling
- Network Security
- Internet Technologies
- Industrial Electricity - Pneumatics, Hydraulics, Process Controls, and Electronics

The Information Technology Center prepares students to take examinations for the following industry-recognized certifications:

- Cisco (CCNA & CCNP)
- Microsoft (MCP, MCSA, MCSE, MOS, and others)
- CompTIA (A+, Networks+, Servers+, L-Nets, Security+, and others)
- C-Tech Network and Fiber Optic Cabling
Information Technology is the development, operation, management, and use of hardware and software systems for the communication and processing of data and information. Technology plays a key role in today’s society with nearly half of the jobs in the United States being in the information technology field.

Chaffey College understands the need to provide quality education and training. The Chino Information Technology Center was created to prepare students for entry into today’s high-tech, fast-growing industries to respond to business needs and offers more than 30 certificates designed to educate students for the computer-related careers that dominate the job market.

Programs

Programs offered at the Chino Information Technology Center lead to industry certification, associate in science degrees, Chaffey College certificates, and/or transferability to four-year colleges and universities. The programs offered are in four specialization areas:

- Computer Systems
- Computer Applications
- Industry Certification Preparation
- Industrial Electricity

Benefits of Chaffey College

Why choose the Chino Information Technology Center over high cost private technical schools? Chaffey College is a two-year community college that has provided quality education to residents of Southern California for nearly 120 years. We know education!

Chaffey College is the only community college in California that has an Information Technology Center dedicated to training in the field of high-tech. Being a community college, we offer more than just quality education.

Benefits of the Robert Pile Chaffey College Chino Information Technology Center

- State-of-the-Art Facility
