

Community Health Worker (Certificate of Achievement)

Community Health Workers (CHWs) are frontline health workers who are trusted members of their community. The Community Health Worker program trains students to work in the field of public health, healthcare, and social services. CHWs provide a wide range of community services including care coordination, screening, contact tracing, and other care support activities. CHWs may also provide health education, informal counseling, social support, outreach, and advocacy. CHWs work to address the social determinants of health and promote health equity and social justice within the community they serve.
